Year 6			
<u>Skills</u>	National Curriculum	Key knowledge	Key vocabulary
Computer systems and networks	Computer systems and networks	Computer systems and networks	Computer systems
Learning about the history of computers and how they have evolved over time. (CS) Using past experiences to help solve new problems. (CS) Writing increasingly complex algorithms for a purpose. (CS) Debugging quickly and effectively to make a program more efficient. (CS) Remixing existing code to explore a problem. (CS) Changing a program to personalise it. (CS) Evaluating code to understand its purpose. (CS) Predicting code and adapting it to a chosen purpose. (CS) Using search and word processing skills to create a presentation. (IT) Understanding how search engines work. (IT) Understanding the importance of secure passwords and how to create them. (DL) Using search engines safely and effectively. (DL)	understand computer networks including the internet; how they can provide multiple services, such as the world wide web; and the opportunities they offer for communication and collaboration. (DL/IT) Use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content. (DL/IT) Select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information. (CS/IT) Use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concerns about content and contact. (DL)	To understand the importance of having a secure password and what "brute force hacking" is. To know that the first computers were created at Bletchley Park to crack the Enigma code to help the war effort in World War 2. To know about some of the historical figures that contributed to technological advances in computing. To understand what techniques are required to create a presentation using appropriate software.	and networks Acrostic code Hacking Caesar cipher Chip and pin system Cipher code Date shift cipher Nth Letter Cipher Password Pig Latin Pigpen cipher Secure Technological advancement

To know the building blocks of computational thinking e.g. sequence, selection, repetition,	Smart school Stop motion Threat Wi-Fi Skills showcase Adapt Algorithm Bugs Coding Debugging Design Edit Electronic Evaluate Information Inputs Loops Output Program Repetition Screenshot Search engine Sequence Snippets Software variables
Using past experiences to help solve new problems. (CS) Writing increasingly complex algorithms for a purpose. (CS) Debugging quickly and effectively to make a program more efficient. (CS) Remixing existing code to explore a problem. (CS) Changing a program to personalise it. (CS) Evaluating code to understand its purpose. (CS) Predicting code and adapting it to a chosen purpose. (CS) Using logical thinking to explore software independently, iterating ideas and testing continuously. (IT) Creating and editing videos, adding multiple elements: music, voiceover, sound, text and transitions. (IT) Using design software Tinker CAD to design a product. (IT)	Design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems by decomposing them into smaller parts. (CS) Use sequence, selection, and repetition in programs; work with variables and various forms of input and output. (CS) Use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs. (CS) Understand computer networks including the internet; how they can provide multiple services, such as the world wide web; and the opportunities they offer for communication and collaboration. (DL/IT) Use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content. (DL/IT) Select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information. (CS/IT) Use technology safely, respectfully and responsibly; recognise acceptable/unacceptable	To know what designing an electronic product involves. To know which programming software/ language is best to achieve a purpose. To know the building blocks of computational thinking e.g. sequence, selection, repetition,	Smart school Stop motion Threat Wi-Fi Skills showcase Adapt Algorithm Bugs Coding Debugging Design Edit Electronic Evaluate Information Inputs Loops Output Program Repetition Screenshot Search engine Sequence Snippets Software variables
